

Product Designer

Company: Newforma, Inc.
Location: Manchester, NH

Job Code: EPD501
Active: May 2011

Newforma, a leading provider of software for design and construction firms worldwide, is growing! Creating software that makes a difference in the AEC industry is what drives our company. If you have the drive and technical expertise required to thrive in a true startup company, we'd like to talk with you. Our vision is to facilitate the seamless flow of information between every information worker in the Architecture, Engineering, and Construction industries. This will require building new applications using the latest Microsoft and web technologies.

Duties and Responsibilities:

Newforma is currently seeking an individual with demonstrated commercial success in the product design of technical application software. Duties include requirements analysis, understanding of customer workflows, feature definition, creation of product specifications and coordination with product marketing, liaison with the development team, UI design and usability testing with customers.

Qualifications:

- 2-3 years experience working with technical software applications
- 2-3 years of technical experience in architecture, construction or engineering is preferred
- Strong verbal and written communication skills
- Demonstrated ability to present and explain complex concepts to a technically astute audience
- Strong time management skills and the ability to manage and balance the schedule for on time delivery of specifications to meet deadlines
- Ability to be proactive with a proven track record of delivering on responsibilities and tasks
- A technical writing sample is required from all candidates
- Self-motivated individual

Newforma offers a comprehensive competitive benefits package which includes excellent medical, dental and vision plans; stock option plan; a 401k plan; FSA accounts, and company paid life and disability plans and Paid Time-Off (PTO).

Interested candidates should submit cover letter with salary requirements and resumes to our HR department at careers@newforma.com please reference Job Code: **EPD501**

Newforma, Inc. located in Manchester, NH serves architecture, engineering, construction and owner/operator (AECO) organizations worldwide with software to streamline work processes, reduce exposure from errors and omissions, improve coordination and communication, increase visibility into cost and quantities, and enable greater repeatability of project success. Its flagship product, Newforma Project Center™, creates a more productive environment for project managers and the project team by organizing information, facilitating information exchange, and enabling efficient process.
