Landscape Architecture and Urban Design	

“I recently had to pull up an old email to resolve a disagreement. I had an email from June 2007 that cleared up the confusion. And I found it while we were on the phone!”

SP-SSA International Terminal; South Vietnam

Challenges?

- Project information was flooding in from team members in Panama, Mexico, Vietnam, and the United States.
- At only 25% complete, the project had generated more than 10,000 e-mails and 600 submittals.

Results?

- Newforma’s PIM solution has streamlined BergerABAM’s management of e-mail, submittals (whether outgoing or incoming), transmittals, RFIs, markups, and action items.
- Newforma Info Exchange frees the company from the shortcomings of sharing files via email or FTP.
- Functions to manage the project timeline, project team, project files, and record copies all contribute to a firmer, more solid information footing.
