Residential	

“We utilize Newforma Markup to review electronically submitted shop drawings and respond to requests for information.”

Seattle Children's Hospital Bellevue Clinic; Seattle, Washington

Challenges?

- Improve communication with clients and consultants.
- Take advantage of BIM's 3D perspectives to help everyone literally “get the picture.”
- Manage contract administration, from logging to marking up to stamping to sharing, electronically.

Results?

- The firm has streamlined CA.
- The record kept by the software mitigates the risk of disputes down the line.
- Everything is easy to find, not simply because of the markup log, but also because Newforma software includes a search function that finds terms as they appear in markup notes.
